

# MISSING

Just a day after he was born, my son was kidnapped so his milk could be sold. Don't humans know that cow's milk is NOT designed for human bodies, that it's now known to NOT build strong bones, that it's got cholesterol +sex hormones +cancer connections, and that it's worse for our planet/home than any plant-milk? Don't they know that the mom & calf bond is very strong, and that I'm now MISSING him? Most newborn boys are killed by the dairy industry, so it's probably too late for my boy. But this is going to happen to me every year of my life, unless you stop paying for it to happen. Please visit me at:
